Practice Sheet 1.4. – Syriac Alphabet Practice (Estrangela)

(Last Updated: May 24, 2018)

The first column has the unattached form of each letter. In the second column, write out each letter followed by the letter \mathbf{o} to practice writing letters that have the potential to be attached to the following letter. Pay special attention to letters that cannot be attached directly to the following letter.

Syriac Alphabet With Letters That Can Be Attached to the Left
